Articles

A

A bridge designer's view of lightweight concrete 1:7
A chance to meet Ian Thornton 8:17
A future for the past (CS Scene) 3:39
A pride of bridges on Peterborough parkway 7:22
A record made to be broken 9:41
Admixtures for concrete, Waterproofing (CS Scene) 8:31
An introduction to concrete in the Far East, Part 2 3:26
Analysis of hardened concrete — precision of cement content analysis 12:8
And inwardly digest (CS Scene) 4:27
ARC pipeworks, Most modern machinery at
Associations, The
— Association of Gunite Contractors, The 7:13
— CAA, The 6:37
— GRCA, The 3:23
Award, 1985, Concrete Society 6:7

B

'B' beside the seaside 3:11
BAPC management buy-out makes it 6:28
Bridges
A pride of bridges on Peterborough parkway 7:22
Bridge designer's view of lightweight concrete, A 1:7
Bridging the River Tano 1:15
Cable-stayed solution for Ealing Broadway Centre 1:11
Developments in boxbeam bridge decks 1:4
East Moors Viaduct 6:13
Kylesku Bridge 6:11
North Wales Coast road structures 8:26
Queen Elizabeth Bridge 6:19
Rotation designed into Ryton Bridge 12:32
Salek South Bridge, Malaysia 1:13
'Wine-glass' piers for Gade Valley Viaduct 11:19
Block of many colours 5:14
Block machine makers, Cut-throat times for 7:35

C

CAD in a water authority design office 11:7
Carbonation of concrete, A practical approach to studying 10:32
Changes in cement properties and their effects on concrete design implications 7:26
Coastal Protection
'B' beside the seaside 3:11
Coastal contracts 3:15
Concrete Dolos units protect new North Wales coast road 3:7
Winning back Wirral's beaches 5:27
Composite Construction
Composite floor for Terminal 4 2:15
Current design of composite floors 2:9
Lightweight concrete for composite floors and beams 2:11
Computer Technology
CAD in a water authority design office 11:7
Computer-controlled production of hollow blocks and paving 3:43
Computer technology for production control 9:9
Computers come to floor firms 5:33
Exchange of information 11:9
Microcomputers for engineers — What next? 11:5
Production of 'foam' concrete by microcomputer 11:12
Software selection 11:15
Concrete and the clay, The 10:35
Concrete chemicals in Hawarden by-pass project 1:15
Concrete Day 2:34
Concrete engineering at Sellindge Converter 10:29
Concrete in the Far East, An introduction to, Part 2, 3:26
Concrete learning objectives (CS Scene) 12:29
Concrete, Microsilica 10:21
Concrete Reader Survey Results 9:16
CS award winner's problem solver 2:17
CS Working Party examines prestressed concrete pavements 10:17
Concrete Society Award, 1985, The 6:7
Concrete Society Canoe Races 9:38
Concrete structures, Fires in 6:31
Concrete, The philosophy of testing 12:4
Concreting, Selling advanced methods of 4:33
Concreting operations, Methods and rates for 8:34
Curving the colossal 9:28
Cut-throat times for block machine makers 7:35

D

Design of concrete masonry diaphragm walls (CS Scene) 8:21
Developments in boxbeam bridge decks 1:4
Digging for diaphragm walling 4:7
Durability, Testing concrete for, Part 1, 6:40
Part 2, 7:19

E

Effect on changes in UK cements upon strength and recommended curing times 9:22
Exchange of information 11:9

F

Fine forecast for ferocement 5:25
Fineness testing of fly ash 12:12
Fires in concrete structures 6:31
Flexible revetment panels — a shape for any situation 5:19
Floor flatness in the UK 2:23
Focus on,
— FIP 10:41
— RILEM 3:36
For pfa a coal crisis without tears 3:25
Full circle for Farr 6:46

G

Glassfibre reinforced cement permanent formwork 2:31

H

Hawarden by-pass project, Concrete chemicals in 1:15

I

Ian Thornton, A chance to meet 8:17
Investing in the future 1:29
ISAT for limit stage design for durability, The (CS Scene) 7:29
It's all happening on Concrete Day (CS Scene) 2:35
It's only a b****y car park! 8:11

K

Kylesku Bridge 6:11

L

Lightweight concrete, A bridge designer's view of 1:7
Lightweight concrete for composite floors and beams 2:11
Liverpool redevelopment — an engineer's challenge 2:18
Low-cost housing for remote islands 5:17

M

Methods and rates for concreting operations 8:34
Microcomputers for engineers — What next? 11:5
Microsilica concrete 10:39
Most modern machinery at ARC pipeworks 8:39

N

New floors from a new works 2:41
Newly shown at ICE 1:31
North Wales Coast road structures 8:26

O

Operative skills — some lessons from the USA (CS Scene) 1:21
Opportunities missed 9:12
Overseas markets for UK concrete expertise (CS Scene) 9:33

P

Parafil tendons, Prestressing with 10:12
Philosophy of testing concrete, The 12:4
Pigments for concrete and mortar 3:21
Polymer concretes — a status review 3:33
Polymer grids — the breakthrough into concrete 2:29
Portland cements 5:35
Practical approach to studying carbonation of concrete, A 10:32
Practical aspects of pumping structural lightweight concrete 7:10
Precast Concrete
BAPC management buy-out makes it 6:28
Block of many colours 5:14
Flexible revetment panels — a shape for any situation 5:19
Low-cost housing for remote islands 5:17
New floors from a new works 2:41
Precast components for Drax Power Station 5:7
Precast debate — the lessons so far 8:5

Precast flags for a parking deck 8:13
Purveyors of quality 5:22
Small firm features thermo-formed moulds 10:39
Strongroom security from precast blocks 12:27
Prestressed concrete
CS Working Party examines prestressed concrete pavements 10:17
Focus on FIP 10:41
Prestressing with Parafil tendons 10:12
Support for St Wilfrid's 10:7
£¾ million contract now in progress at Gatwick 10:24
Trends in prestressed concrete (CS Scene) 10:25
Production of 'foam' concrete by microcomputer 11:12
Pumping Concrete
Pumping and guniting 7:17
Pumping is the answer — What is the problem? 7:5
Separate placing booms and their use in the UK 7:7
The practical aspects of pumping structural lightweight concrete 7:10
Pulverised fuel ash in structural precast concrete 6:32
Punching 12:23
Pursuit of excellence, The (CS Scene) 6:43

Q

Quality assurance with ready mixed concrete 9:6
Queen Elizabeth Bridge 6:19

R

Ready Mixed Concrete
Computer technology for production control 9:9
Quality assurance with ready mixed concrete 9:6
Revised specification for ready mixed concrete in London 4:23
Reader Survey Results 9:16
Record made to be broken, A 9:41
Resin compositions in the construction industry — BS 6319 12:16
Roof tile industry's third force — "here to stay" 11:27
Rotation designed into Ryton Bridge 12:32

S

Salek South Bridge, Malaysia 1:13
Sealing water — retaining structures 5:41
Selling advanced methods of concreting 4:33
Separate placing booms and their use in the UK 7:7
Sewer renovation without surface disruption 4:11
Shear 11:25
Site Practice Award 1985 11:31
Small firm features thermo-formed moulds 10:39
Special reinforcing steels 9:19
Specifying composite cements, fuel ash and ground granulated blastfurnace slag in concrete 8:30
Spraydome for bulk storage to be built in Northants 7:16
Sprayed steel fibre concrete Part 1, 3:17
Part 2, 4:18
Strongroom security from precast blocks 12:27
Structural lightweight aggregate concrete — Why should it be used for multi-storey structures and car parks? 8:8

T

Tailor-mace batching plant for common block production 4:25
Testing concrete for durability Part 1, 6:40
Testing concrete quality Part 2, 7:19
Testing concrete round up 12:21
Testing concrete, The philosophy of 12:4
Trends in prestressed concrete (CS Scene) 10:25
"True stuff of invention, The" 9:39

W

Water effects in Triton Court atrium 1:19
Waterproofing admixtures for concrete 8:31
Why do few joints in concrete roads fall in service? 11:27
William Corbett House 6:15
Wine-glass piers for Gade Valley Viaduct 11:19
World of Concrete comes to Europe 10:24
